

David Adindu

PROFILE

My passion for problem solving and software development came from finding joy in being able to analyze technical problems and then turning that analysis into an equitable solution. Communicating with others and working in teams poses no threat to me and I enjoy socializing even while in the process of working. My main goal is to gain industry experience and strengthen my technical skills as well as my professional skills.

Currently pursuing a Level 8 Certificate in Mainframe Technologies in the Letterkenny Institute of Technology, I am on a path to become an industry standard software and mainframe developer. Curiosity is my greatest strength, I have a desire to learn as many new things as quickly as possible. I have strong programming skills with experience using Java, Javascript, Python and MySql.

PROGRAMMING EXPERIENCE

- ☐ Java
- ☐ Python
- ☐ Javascript (MERN Stack)
- ☐ COBOL
- ☐ MySQL & NoSQL Databases

EDUCATION

- **Letterkenny Institute of Technology** - Mainframe Technologies (Level 8 Certificate)
